

CARE AND CLEANING OF EMPORIUM SINKS SINK

General Cleaning

It is recommended to clean EMPORIUM SINKS sink's daily to avoid build-up of soap or mineral deposits, as these tend to have an adverse effect on the appearance of the product. For daily cleaning use an ordinary mild detergent and soft cloth to rinse and dry the sink. Allowing water or cleaners to evaporate will negatively impact the look of the sink. To avoid this, it is important to dry the sink after each use.

- To avoid unwanted build-up, it is recommended to dry your sink after each use.
- Soft abrasive cleaners may be used when necessary ,Strong abrasive cleaners will scratch and dull the surface
- Do not use abrasive pads like steel wool or wire brushes, as these can damage the finish of the sink.
- Stubborn stains and water marks can be wiped with a 50/50 white vinegar and water solution. Towel dry with a cotton cloth.
- Leaving dirty dishes, coffee grounds, or other staining materials in your quartz sink can negatively impact the color and finish of your sink.

Care:

- To restore the color and shine of your quartz sink, apply 1 to 2 teaspoons of mineral oil to a clean, dry cloth. Evenly distribute the oil in a thin layer and allow it to sit for about 2 minutes, and then wipe away any excess.

Success with cleaners are dependent on the quality of the water being used. Failure to follow care and cleaning will void your warranty.

Home Remedies

- For major stains or grime on your sink, a mixture of a half a cup of white vinegar and a half cup of water will help. Dip a cloth into the solution and rub away the grime or stain. The solution should then be rinsed off and dried to prevent damage to your sink's finish.
- Another solution for major grime or stains, is a small amount of baking soda and water on a toothbrush. This should remove any nasty stains. Again the solution should then be rinsed off and dried to prevent damage to the finish of your sink.

DO NOT allow any part of your sink to soak in either of the above mixtures. It is also recommended to test the above mixtures on an unseen part of your sink to see what affect it has to the finish of your sink.
